measureMotion³

**All your measurement needs.
All in one device.**

Measure motion without complexity

The newest all-digital range-of-motion device developed specifically for health care professionals. Now, you can perform measurement functions faster, smarter and more efficiently.

Lightweight heavy lifter

Primed and ready to perform, this portable package is packed with the latest digital technology. Use it everywhere, in the clinic, on rounds, in training sessions or in the field without breaking a sweat. Our one-button technology is easy, fast and accurate.

High-performance. Stylish design.

Weighing in at just under 0.0 ounces, you can keep this slim, sleek 6" beauty in your pocket for easy access. Widescreen LED display, functional quick action buttons and high-speed processing saves you time and makes range-of-motion measurements more accurate than ever before.
